MARKETS SERVED

- Car and truck dealers
- Service shops
- Quick lubes

FLUIDS HANDLED

- Antifreeze solutions
- Synthetic and mineral oils
- Used oil

Mobile oil drains are used for gravity or suction collection of used motor oil and gear oil.

Once full, depending on model, the reservoir can be discharged either using a remote pump through a dry-break or a cam-lock connector or pressurizing the unit reservoir at 3.5 psi (0.5 bar) maximum.

All models include 5 gallon capacity, height adjustable steel collection bowl and level gauge.

27 gallon models include oversized poly extension bowl with anti-splash screen.
